CONCISE STATEMENT OF RELEVANCY

JP'529 discloses a system comprising a relay device (central management device) and a plurality of reading devices communicatively connected to the relay device. In one of the reading devices, an expenditure is subtracted from remainder information stored in a prepaid card, and a user is allowed to use the prepaid card in the range of the remainder. The system allows the user to use the prepaid card without subtraction even when a communication failure is occurred in the relay device or a communication network (cf., paragraph [0035]).
